INTERNATIONAL SCHOOL OF LOUISIANA
18 AÑOS DE TRAYECTORIA ~ UN PROJET DE 18 ANS

March 1, 2018

Dear 7th Grade Families,

We are excited that our 7th grade students will have the opportunity to participate in a remarkable science based overnight field experience, through [T.R.E.E.](#)'s [Sunship III](#). During this three day, two night school experience in the woods, students will:

- discover the human impact on the environment
- identify energy sources and nutrient cycles
- deepen their understanding of ecosystems

all while developing an appreciation for themselves and their important role in their community.

We are thrilled to be able to bring this very expensive program to our students for only \$10.00. Because this is considered school and part of the curriculum, it is paid for through our school budget just like all other science curriculum.

For some of you, the idea of your child spending two nights away from home does not raise any concerns. For others, this is a brand new experience. We want to make sure that everyone has all the information they need to feel comfortable with the idea of their child participating.

Parents and students are invited to attend an important informational meeting on Tuesday, March 6 at 5:00 PM at the Uptown campus. At this meeting, you will learn more about this program and meet the coordinator. This meeting should only take an hour.

Target Language Spanish students will leave school the morning of April 11 and return back to school for regular dismissal the afternoon of the 13th.

Target Language French students will leave school the morning of April 16 and return back to school for regular dismissal the afternoon of the 18th.

Please feel free to contact me or Ms. Anna Merlos if you have any questions.

Best,

Laura Adelman-Cannon
